

MAGLIFE light

MRI monitoring for all

Safe day-to-day monitoring of MRI patients

SCHILLER, the undisputed world wide leader of MRI patient monitoring, has complemented its successful Maglife product line with the MAGLIFE light. Now MRI monitoring is within reach of virtually every MRI Center. MAGLIFE light can handle all your monitoring needs and is compatible with MRI scanners up to 3 Tesla. MAGLIFE light has a large colour screen visible from the control room, displaying the patient's SPO₂, pulse rate and/or NIBP values. The sensors are suitable for all types of patient – adults, children, neonates and premature infants.

Universal use on a day-to-day basis

MAGLIFE light is the ideal patient monitor for your routine MRI examinations. Compact and easy to use, MAGLIFE light does not require any installation procedure and has been designed for daily use.

All the functions of a "big" monitor:

- Indication of saturation, pulse or heart rate and non-invasive blood pressure values (Sys, Dia, MAP)
- Saves and displays the most recent NIBP values measured
- Display of patient values on large colour screen visible from across the room
- Mains and battery power supply
- Visual and audible alarms
- Low-battery alarm
- Integrated magnetic field detector
- Operates at up to 400 Gauss (40mT)
- Standby mode for instant restarting

- Standard external USB printer to document each examination
- Downloadable software
- Lightweight and easy to handle
- For installation on stand, shelf, articulated arm
